PHYS 4102/6102: Theoretical Mechanics II

Instructor: K. Nakayama, Room 219

Reading List:

Text 0 – *Note on Lagrangian Mechanics*, K. Nakayama

Office Hours: T 3:30-4:30, R 11:30-12:30

In-class Exams: Test I, Test II (All Closed Book)

Final Exam: (Cumulative.) Replaces the lowest test grade.

Excused Absences: An excused absence for any test will cause the final exam grade to be substituted for that test grade.

Homework: Selected Problems will be graded. Your lowest homework score will be dropped from your course average. No other allowances will be made for late or missed homework. Your homework average constitutes 1/3 of your course grade. Homework study groups are strongly encouraged, but you must hand in your own work. Plagiarism is forbidden by the Academic Honesty Policy of UGA and will be dealt with accordingly.

- Grade = \((\frac{1}{3} \times \text{Homework} + \frac{1}{3} \times \text{Test I} + \frac{1}{3} \times \text{Test II})\)

Incompletes: Rules concerning withdrawals and incompletes: We will follow the rules of the UGA Bulletin concerning withdrawals and incompletes.

Grading Scheme: Use of the plus/minus system is a requirement – it is the only grading system approved for the University of Georgia.

\[
\begin{align*}
A & \equiv [85, 100] & A- & \equiv [82.5, 85] \\
B+ & \equiv [80, 82.5] & B & \equiv [70, 80] & B- & \equiv [67.5, 70] \\
C+ & \equiv [65, 67.5] & C & \equiv [55, 65] & C- & \equiv [52.5, 55] \\
D & \equiv [40, 52.5] & F & \equiv [0, 40]
\end{align*}
\]

Academic Honesty: All academic work must meet the standards contained in "A Culture of Honesty." Students are responsible for informing themselves about those standards before performing any academic work. More detailed information about academic honesty can be found at the website given above. As a UGA student, you are responsible for knowing and understanding this policy. If you have any questions about the propriety of actions relating to this course, you are obligated to ask me for clarification. See also the UGA website: [http://www.uga.edu/honesty/](http://www.uga.edu/honesty/).
Topics:

We follow tentatively the topics as listed below and in the assigned Text 0 (available at our course website). They are subject to changes and you are responsible to keep track on any such changes.

1. Rigid Body
2. Systems with Many Degrees-Of-Freedom
3. Continuos Mechanics: Waves
4. Hamiltonian Approach
5. Hamilton-Jacob Approach
